History and Physical

Priya Nandakumar, MD - Admission date 09/13/2026 - Signed

CHIEF COMPLAINT

Painful swelling of the right forearm for 4 days.

HISTORY OF PRESENT ILLNESS

33-year-old woman with 4 days of a painful, enlarging lump on the inner right forearm with surrounding redness. No fever. Exam shows a 3 cm fluctuant abscess with 4 cm of surrounding cellulitis.

Incision and drainage at the bedside on 09/13/2026 at 20:30. About 6 mL of pus drained. Wound culture sent. Cavity packed with gauze. Admitted for IV antibiotics overnight because of the surrounding cellulitis.

PAST MEDICAL HISTORY

- No chronic medical conditions

PAST SURGICAL HISTORY

None.

HOME MEDICATIONS

None.

ALLERGIES

No known drug allergies.

SOCIAL HISTORY

Unhoused for about 10 months. Sleeps in a park. Denies injection drug use. Walks and cares for herself independently.

PHYSICAL EXAM

General: Awake, alert, in no acute distress.

HEENT: Normocephalic. Mucous membranes moist.

Cardiovascular: Regular rate and rhythm. No murmurs.

Respiratory: Clear to auscultation bilaterally. No increased work of breathing.

Abdomen: Soft, non-tender, non-distended.

Extremities: Right inner forearm: 3 cm fluctuant, tender swelling with 4 cm of surrounding redness. After drainage: 1.5 cm incision, packed. Hand strength and sensation normal.

Skin: Warm and dry.

Neuro: Alert and oriented x4. Walks without difficulty.

Psych: Calm, cooperative. Normal mood and affect.

ASSESSMENT AND PLAN

- Right forearm abscess with cellulitis: drained 09/13. IV antibiotics overnight, then oral.
- Wound culture pending.
- Packing change and wound check in 48 hours.
- Disposition: unhoused. Case management consult.

Progress Notes

09/15/2026 07:10 Priya Nandakumar, MD Hospital Medicine Progress Note

Afebrile. Redness receding. Pain controlled. Changed to oral trimethoprim-sulfamethoxazole yesterday evening. Dressing dry. Wound culture still pending.

Plan discharge today. Needs packing change and wound check 09/16.

Vital Signs Flowsheet

Two sets shown. Complete flowsheet available from the unit.

Case Management / Social Work Note

Olivia Brandt, MSW - 09/15/2026 07:50

Patient is unhoused and sleeps in a park. She has no way to keep the wound clean or get the packing changed. She is interested in recuperative care. Sending the referral now so she is not delayed; the rest of the chart can follow.

DISCHARGE PLANNING
