CLINICAL JUSTIFICATION

Recuperative care referral. 62-year-old man recovering from a long hospital stay for pneumonia with sepsis. Infection resolved. Walks with a walker on his own. Has a sacral pressure wound that needs dressing changes. Unhoused. Ready 09/19.

History and Physical

Elena Vasquez-Ruiz, DO - Admission date 09/04/2026 - Signed

CHIEF COMPLAINT

Fever, cough and confusion.

HISTORY OF PRESENT ILLNESS

62-year-old man brought by ambulance with fever, cough and low blood pressure. Chest X-ray showed multilobar pneumonia. He needed a breathing tube and blood pressure support and was in intensive care from 09/04 to 09/10, on a ventilator for 4 days.

Addendum 09/16/2026: breathing tube out 09/08. Transferred to the medical unit 09/10. Antibiotics finished 09/14. A pressure injury over the sacrum and coccyx was first noted on 09/09 after prolonged bed rest and is now stage 3.

PAST MEDICAL HISTORY

- No known chronic conditions before this admission

PAST SURGICAL HISTORY

None.

HOME MEDICATIONS

None.

ALLERGIES

No known drug allergies.

SOCIAL HISTORY

Unhoused for about 18 months. Stays at an encampment. Drinks 2 to 3 beers a few times a week. No drug use.

PHYSICAL EXAM

General: Critically ill on arrival. See addendum for current status.

HEENT: Normocephalic. Mucous membranes moist.

Cardiovascular: Fast heart rate. Blood pressure low on arrival.

Respiratory: Fast, labored breathing. Coarse breath sounds in both lungs.

Abdomen: Soft, non-tender, non-distended.

Extremities: No edema.

Skin: On 09/16: stage 3 pressure injury over the sacrum. See wound care note.

Neuro: Confused on arrival. Oriented to name only. Moves all limbs.

Psych: Unable to assess on arrival.

ASSESSMENT AND PLAN

- Septic shock from pneumonia: resolved. Antibiotics complete.
- Deconditioning after critical illness: physical therapy.
- Stage 3 sacral pressure injury: wound care nurse following.
- Disposition: unhoused. Case management consult.

ARCENEAUX, PHILLIP (MRN: SYN-339018) DOB: 09/30/1963 62y M Los Olivos Regional Hospital · Medical Unit 4C

Diagnostic Imaging Report

Chest X-ray, 2 views - 09/15/2026 08:10

Indication: Follow-up pneumonia after sepsis.

FINDINGS

Patchy airspace opacities in both lower lobes are much smaller than on 09/04. No pleural effusion. No pneumothorax. Breathing tube has been removed.

IMPRESSION

Resolving multilobar pneumonia.

Electronically signed by S. Ferreira, MD

Progress Notes

09/17/2026 09:20 Elena Vasquez-Ruiz, DO Hospital Medicine Progress Note

Afebrile, off antibiotics for 3 days. Breathing comfortably on room air with no breathing treatments since 09/11; respiratory therapy has signed off. Eating well. Walking with a front-wheeled walker.

The sacral wound is clean and healing but needs skilled dressing changes after discharge. He cannot reach it himself. Home health wound care to be arranged before discharge.

Wound Care Consult

Trevor Halloran, RN, CWOCN - 09/17/2026 13:10 - Signed

Reason for consult: Sacral pressure injury.

Stage 3 pressure injury over the sacrum and coccyx, 3.0 x 2.5 x 0.5 cm. Wound bed 90% red granulation tissue. No undermining or tunneling. Small amount of clear drainage. No odor. Surrounding skin intact. No signs of infection.

The patient cannot see or reach the wound and cannot change the dressing himself.

RECOMMENDATIONS

- Cleanse with saline, apply hydrofiber and a foam border dressing. Change daily and when soiled.
- Skilled nursing wound care after discharge. First visit within 24 hours of discharge.
- Offload: turn side to side in bed, use a pressure-relief cushion when sitting.

Physical Therapy Evaluation

Joel Marchetti, PT - 09/17/2026 10:45 - Signed

Area	Finding
Bed mobility	Independent
Transfers	Independent
Ambulation	150 ft with front-wheeled walker, modified independent, one standing rest break
Balance	Fair. Safe with walker
Assistive device	Front-wheeled walker. Uses it correctly without cues

ASSESSMENT

Deconditioned after critical illness but improving daily. Safe and independent with a walker.

Discharge recommendation: Recuperative care with a walker. Home health physical therapy if available.
