SYNTHETIC RECORD FOR A HACKATHON - NOT A REAL PATIENT - Claude Impact Lab OC 2026

FARROW, DENISE (MRN: SYN-220836) DOB: 05/23/1965 61y F St. Brendan Community Hospital · 3 North Medical

History and Physical

Thomas Achterberg, MD - Admission date 08/10/2026 - Signed

CHIEF COMPLAINT

High blood sugar, thirst and frequent urination for 5 days.

HISTORY OF PRESENT ILLNESS

61-year-old woman with type 2 diabetes for 9 years. She has taken insulin glargine 24 units nightly for about 3 years, plus metformin. Six days ago her bag with her insulin pens, glucometer and test strips was stolen while she slept outdoors. She has had no insulin since. She reports thirst, frequent urination and blurry vision.

Glucose 512 mg/dL in the emergency department. Anion gap 12, bicarbonate 23, beta-hydroxybutyrate 0.3 mmol/L, venous pH 7.38. She is not in diabetic ketoacidosis. Given IV fluids and subcutaneous insulin. Her home insulin glargine was restarted the evening of 08/10.

PAST MEDICAL HISTORY

- Type 2 diabetes mellitus, 9 years. Hemoglobin A1C 10.9% this admission
- Hypertension
- Hyperlipidemia
- Diabetic peripheral neuropathy

PAST SURGICAL HISTORY

- Cholecystectomy, 2011

HOME MEDICATIONS

- Insulin glargine 24 units under the skin nightly (none for 6 days)
- Metformin 1000 mg by mouth twice daily
- Losartan 50 mg by mouth daily
- Atorvastatin 20 mg by mouth nightly

ALLERGIES

No known drug allergies.

SOCIAL HISTORY

Unhoused for 8 months after an eviction. Sleeps outdoors near a transit center. No tobacco, alcohol or drug use. Has checked her own sugars and given her own insulin for years.

PHYSICAL EXAM

General: Awake, alert, mildly dehydrated, in no distress.

HEENT: Dry mucous membranes.

Cardiovascular: Regular rate and rhythm. No murmurs.

Respiratory: Clear to auscultation bilaterally. No increased work of breathing.

Abdomen: Soft, non-tender, non-distended.

Extremities: No edema. No foot ulcers. Decreased light touch sensation in both feet.

Skin: Warm and dry.

Neuro: Alert and oriented x4. No focal deficits.

Psych: Calm, cooperative. Normal mood and affect.

ASSESSMENT AND PLAN

- Hyperglycemia from missed insulin, no DKA: IV fluids, restart home glargine tonight, correction scale, check sugars four times daily.
- Diabetes education consult to confirm meter and injection technique and replace supplies.
- Hypertension and hyperlipidemia: continue home medications.
- Disposition: unhoused. Case management consult.

Progress Notes

08/11/2026 10:05 Thomas Achterberg, MD Hospital Medicine Progress Note

Feeling better. Thirst and urination improved. Glargine 26 units given last night, up from her home dose of 24. Morning glucose 248. No low blood sugars. Eating a full diet. Metformin resumed today.

08/12/2026 09:40 Thomas Achterberg, MD Hospital Medicine Progress Note

Last five point-of-care glucose readings: 248, 214, 186, 171, 158. Steadily improving. No episodes of hypoglycemia this admission. Dials and injects her own insulin pen with nursing watching.

Discharge 08/13 on glargine 26 units nightly, metformin, and a written correction scale. Primary care visit booked for 08/18. Needs a safe place to store insulin and supplies.

SYNTHETIC RECORD FOR A HACKATHON - NOT A REAL PATIENT - Claude Impact Lab OC 2026

FARROW, DENISE (MRN: SYN-220836) DOB: 05/23/1965 61y F St. Brendan Community Hospital · 3 North Medical

Diabetes Education Consult

Monique Ferrell, RN, CDCES – 08/12/2026 11:15 – Signed

Reason for consult: Confirm self-management skills and replace supplies.

Patient checked her own blood sugar with the new glucometer: washed hands, loaded strip, lanced, read and logged the result correctly. She dialed and injected insulin glargine with a pen correctly on 08/11 at 21:00 and again by teach-back today. She rotates sites.

She names the symptoms of low blood sugar and describes treating it with 15 grams of fast sugar and rechecking in 15 minutes. She was given a written plan: glargine 26 units nightly, correction scale before meals, and when to hold a dose and call.

RECOMMENDATIONS

- New glucometer, strips, lancets and pen needles, 30-day supply at discharge.
- Primary care follow-up 08/18/2026.
- No barriers to self-administration of insulin.

Case Management / Social Work Note

Miguel Ortega, MSW - 08/12/2026 12:40

Patient has been unhoused for 8 months. Her insulin and supplies were stolen while she slept outside. She wants a place where she can keep insulin safe while her sugars settle. She is agreeable to recuperative care and manages all of her own diabetes care.

DISCHARGE PLANNING

Item	Status
Housing	Unhoused 8 months.
Disposition	Recuperative care referral faxed 08/12/2026.
Medications	Self-manages, including insulin.
Follow-up	Primary care, community health center, 08/18/2026 09:00.
Health plan authorization	Submitted 08/12/2026. Pending.
